Jordon Leach

Front End Developer

Goal-oriented Front End Developer with a strong commitment to collaboration and problem solving. Using web design software to develop customer-focused websites and designs. Committed to high standards of web design, user experience, usability and speed for multiple types of end-users. Proven experience developing websites using HTML, CSS, JavaScript, and React.js.

Work History

2019-10 - Current

Front End Developer

CadmiumCD, Forest Hill, MD

- Rebuilt and restructured existing webpages to utilize a CI/CD approach to increase lifespan and readability of the code-base.
- Implemented anti-spam techniques to all request forms resulting in 1.6k requests being rejected in Q1 of 2020.
- Boosted web traffic by reducing time to first meaningful paint and removing errors/bugs by converting all existing JavaScript to TypeScript.
- Introduced concept of reusable components to drastically minimize the amount of time necessary to build webpages.
- Integrated Docker containers to increase compatibility of Node.js with the Azure Devops platform.
- Tested prototypes before deployment, applying best practice diagnostic techniques to verify usability.
- Collaborated with stakeholders during development processes to confirm creative proposals and design best practices.
- Researched new technologies, software packages and hardware products for use in website projects.

2018-09 - Current

Web Developer

Web Design

- Developed, built, and updated WordPress (PHP) and React.js sites for clients such as Thread Coffee Roasters and Britestar.
- Conceived and built optimized landing pages in HTML and CSS, including Stripe integration and cross-browser compatibility, to support e-commerce and marketing.
- Analyzed requirements and designed, developed and implemented software applications for multiple websites.
- Collaborated with in-house web designers to create sleek and innovative UI design.
- Completed full redesigns of existing websites to improve navigation, enhance visuals and strengthen search engine rankings.

2017-11 - 2018-06

Photo Lab Technician

Techlab Photo, Baltimore, MD

- Conceived and streamlined workflow by building a database server to collect and organize all company data.
- Reduced unnecessary labor by consolidating existing intranet and optimizing software/hardware needs.

2010-08 - 2014-11

Aircraft Armament Systems Journeyman

US Air Force, Multiple Locations

- Installed, maintained, and troubleshot the F-16 aircraft weapons/suspension and electrical systems.
- Analyzed malfunctions and performed functional checks of launch/suspension systems.
